Re: Indian Patent Application No. 519/MAS/86
based on U.S. Serial No. 752022
Our File No.: PM 1221
Your File No.: 27843

Dear Antony:

I received your letter of October 6, enclosing the first action, and agree with your comments. The corresponding U.S. (USSN 752022) has issued (U.S. 4,628,947) and a copy was sent earlier along with the amendment to review for a response in the Argentina case. Let me know if you need another patent copy. For convenience, I am including the claims accepted in the U.S. (by amendment Claims 8-16 were substituted for the original claims 1-7).

Please proceed as indicated and contact Terry Kearney of Fish & Neave if there are further questions as to how to meet the examiner's objection in point 1 of the action.

In response to point 7, the inventors full names are Everett West Southwick and Dennis Michael Driscoll.

Very truly yours,

Beverly
